***Response to Arguments***

3. Applicant's arguments, filed on 02/23/2011, and 05/09/2011, with respect to the pending claims have been fully considered and are persuasive, as a result, the amendment to the claims overcome the rejection. Therefore, the rejection of the last Office action has been withdrawn.

**EXAMINER'S AMENDMENT**

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Benjamin L. Volk, Jr. (Reg. No. 48,017) on May 09, 2011.

The application has been amended as follow:

In the claims,

Replace the old versions of claim 100 to new versions

Claim 100

A data processing system comprising:

a processing card for communication with a processor and a data source via a bus; and

wherein the processing card comprises a re-configurable logic device, the re-configurable logic device comprising a multi-functional pipeline for processing streaming data received by the data processing card from the data source, the pipeline comprising a plurality of different pipelined data processing engines;

wherein each of the pipelined data processing engines in the pipeline is configured to (1) be selectively activated and deactivated in response to control instructions to define a function for the pipeline, and (2) perform a processing operation on the streaming data in response to being activated, the pipeline function being the combined functionality of the activated pipelined data processing engines in the pipeline such that the pipeline is changeable to another function of a plurality of functions in response to control instructions that change which of the pipelined data processing engines in the pipeline are activated and deactivated.

Art Unit: 2162

Replace the old versions of claim 102 to new versions

Claim 102

A data processing method comprising:

within a computer system comprising a processor and a reconfigurable logic device operating under control of the processor, streaming data through the reconfigurable logic device for processing thereby, the reconfigurable logic device comprising a multi-functional pipeline, the multi-functional pipeline comprising a control processor and a plurality of pipelined data processing engines, each of the pipelined data processing engines in the pipeline being configured to (1) receive streaming data and (2) perform a data processing operation on the ~~received streaming data~~ it receives;

the control processor selectively activating and deactivating the pipelined data processing engines in the pipeline to achieve a desired pipeline function, the pipeline function being the combined functionality of the activated pipelined data processing engines in the pipeline; and

the activated pipelined data processing engines in the pipeline performing their data processing operations on the streaming data at hardware speeds.

### REASONS FOR ALLOWANCE

5. With respect to claims 40-52, 54-64, and 98-175 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

With respect to the independent claims 40, and 54, the claimed features "the pipeline comprising a plurality of pipelined data processing engines, the plurality of pipelined data processing engines being configured to perform different processing operations, wherein the pipeline comprises a multi-functional pipeline, and wherein the re-configurable logic device further comprises a control processor, wherein the control processor is configured to controllably activate or deactivate each of the pipelined data processing engines in the pipeline and thereby define a function for the pipeline, the pipeline function being the combined functionality of each activated pipelined data processing engine in the pipeline" in conjunction with other elements of the independent claims are not suggested, anticipated or found to be obvious over the prior art made of record. With respect to the independent claims 51, and 52, the claimed features "as the data passes between the data storage medium and the computer system, through a plurality of stages implemented on the programmable logic device as a processing pipeline, each processing stage being dedicated to a different processing operation; and wherein the processing operations comprise at least two selected from the group consisting of a search operation, a data reduction operation, a data classification operation, an encryption operation, a decryption operation, a compression operation, and a decompression operation" in conjunction with other elements of the independent claims are not suggested, anticipated or found to be obvious over the prior art made of record. With respect to the independent claims 100, and 102, the claimed features "the pipeline function being the combined functionality of the activated pipelined data processing engines in the pipeline such that the pipeline is changeable to another function of a plurality of functions in response to control instructions that change which of the pipelined data processing engines in the pipeline are activated and deactivated" in conjunction with other elements of the independent claims are not suggested, anticipated or found to be obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

Art Unit: 2162

6. The closest prior art, Dixon et al., USPT No. 4,464,718 relates to a method and apparatus for performing data base searches among data stored in a disk file system.

Villasenor et al., relates to configurable computing solutions for automatic target recognition FPGAS for custom computing machines, but fails to teach the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
